

# Corral Hollow Road Widening and Sanitary Sewer Line Upgrade Project

## Project Information Sheet

The proposed project includes the widening of Corral Hollow Road from four lanes to six lanes and the upgrade of existing sanitary sewer pipelines between Fieldview Drive and I-205. One additional vehicle lane will be added in each direction on Corral Hollow Road by reducing the median island width from 40-feet to 18-feet. Completion of this project will improve traffic circulation and provide additional sewer capacity to better serve the community.

In addition, the project includes the intersection modification at Foothill Ranch Drive and Corral Hollow Road, limiting the eastbound left turning movement from Foothill Ranch Drive onto northbound Corral Hollow Road. These improvements will enhance traffic safety at this intersection. Traffic signals and landscaping will also be modified to accommodate the road widening.

To minimize traffic impacts to residents, businesses and nearby schools, the major components of the project will be constructed during Tracy Unified School District's 2017 summer academic break. However, some of the project activities will continue through the fall of 2017.

## Timeline:

Advertise for Bidding: Feb. 2017  
Construction Begins: May 2017  
Widening Complete: Aug. 2017  
Sewer Line Complete: Nov. 2017  
Project Complete: Mar. 2018
